## **ANNEX II**

### **THE GENERAL VALUATION ROLL**

A valuation roll is a legal document that consists of property information of all rateable properties within the boundaries of the County Government. Each entry in the Roll includes the names of the proprietor, tenant and occupier as appropriate, the Net Annual Value which has been set by the Assessor and the Rateable Value. The Rateable Value is derived from the Net Annual value and as legislation currently stands, for the majority of properties, Rateable Value and Net Annual Value are the same. It is produced according to legislation at least once every 10 years.

Valuation rolls in Kenya are currently based on section 3 of Valuation for Rating Act Cap 266

The date of valuation of the current general valuation roll for the county government year 2000. This means that all property values were determined as at that date and the date of valuation for the next general valuation roll was January 2010.

The date of valuation is determined and fixed by County government in terms of legislation. This date is used for all future calculations for the purposes of supplementary valuations or other required calculations, until a new general valuation roll replaces the current roll.

The effective date of valuation is usually on the commencement date of the new financial year of the county government on which the new general valuation roll takes effect. It means that a person may be Levied rates according to the new general valuation roll from the effective date.
